Grade 7 Physics Sample

Chapter 1: Motion

Speed is distance divided by time. Velocity includes direction. Acceleration is change of velocity over time.

Chapter 2: Force

A force can change the motion of an object. Newton laws describe inertia, F=ma, and action-reaction pairs

Chapter 3: Energy

Kinetic energy depends on mass and speed. Potential energy is stored energy. Energy transfers but is con

Chapter 4: Heat

Heat flows from hot to cold. Temperature measures average kinetic energy of particles in a substance.
